### JIT Stats for Process 68420: aspencli

- CommandLine: "aspencli.exe" -template "D:\git\LivingAgile\bin\Aspen\SampleTemplates\\_Controller.txt" -compiled true -consoleLog -q -samples 10
- Process CPU Time: 878 msec
- Total Number of JIT compiled methods : 596
- Total MSec JIT compiling : 372
- JIT compilation time as a percentage of total process CPU time : 42.4%
- [Individual JIT Events](#)
  - [View in Excel](#)
- No JIT Inlining data available. Consider enabling the JITInlining option.
- [JIT Perf Users Guide](#)

**Background JIT compilation events are not being collected.** If you are interested in seeing the operation of Background JIT Enabled the 'Background JIT' checkbox in the 'Advanced' section of the collection dialog when collecting the data. See [Guide to Background JIT](#) for more.

Below is a table of the time taken to JIT compile the methods used in the program, broken down by module. If this time is significant you can eliminate it by [NGening](#) your application. This will improve the startup time for your app.

The list below is also useful for tuning the startup performance of your application in general. In general you want as little to be run during startup as possible. If you have 1000s of methods being compiled on startup you should try to defer some of that computation until absolutely necessary.
